Journal of Mathematical Biology

Volume 35 1996/1997

Managing Editors

K. P. Hadeler, Tübingen
A. Hastings, Davis, CA

Editorial Board

H. T. Banks, Raleigh, NC
O. Diekmann, Utrecht
J. Gani, Canberra
F. C. Hoppensteadt, Tempe, AZ
S. A. Levin, Princeton, NJ
T. Nagylaki, Chicago, IL
L. A. Segel, Rehovot

Advisory Board

W. Alt, Bonn
S. Amari, Tokyo
R. M. Anderson, Oxford
W. Bühler, Mainz
V. Capasso, Milano
C. Clark, Vancouver
B. D. Coleman, Piscataway, NJ
P. Colli-Franzone, Pavia
J. D. Cowan, Chicago, IL
K. Dietz, Tübingen
P. C. Fife, Salt Lake City, UT
S. P. Hastings, Pittsburgh, PA
U. an der Heiden, Witten-Herdecke
W. Jäger, Heidelberg
S. Karlin, Stanford, CA
S. Kauffman, Philadelphia, PA
N. Keyfitz, Laxenburg
J. F. C. Kingman, Oxford
N. Kopell, Boston, MA
M. Mangel, Davis, CA
R. M. May, Oxford
M. Mimura, Tokyo
R. M. Miura, Vancouver
G. Oster, Berkeley, CA
H. G. Othmer, Salt Lake City, UT
L. A. Peletier, Leiden
A. S. Perelson, Los Alamos, NM
P. Richter, Bremen
J. M. Rinzel, Bethesda, MD
S. Sawyer, St. Louis, MO
K. Sigmund, Wien
H. L. Smith, Tempe, AZ
M. Turelli, Davis, CA
J. J. Tyson, Blacksburg, VA

Springer

Journal of Mathematical Biology

Founded and edited in 1974 by H. J. Bremerman, F. A. Dodge Jr., and K. P. Hadeler.
As of Vol. 9 (1980) edited by K. P. Hadeler and A. Hastings.

Copyright
Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warrantly, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0303-6812, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Contents of Volume 35 (1996/1997)

Ackleh AS, Fitzpatrick BG: Modeling aggregation and growth processes in an algal population model: analysis and computations 480
Agostinho Neto A → Teso A
Allegretto W, Xie H, Yang S: Properties of solutions for a chemotaxis system 949
Andreasen V, Lin J, Levin SA: The dynamics of cocirculating influenza strains conferring partial cross-immunity 825

Baake E, Wiehe T: Bifurcations in haploid and diploid sequence space models 321
Bartuccelli MV → Gourley SA
Behncke H: Optimization models for the force and energy in competitive running 375
Beretta E, Solimano F, Takeuchi Y: A mathematical model for drug administration by using the phagocytosis of red blood cells 1
Bonneuil N, Müllers K: Viable populations in a prey–predator system 261

Calsina À, Saldaña J: Asymptotic behaviour of a model of hierarchically structured population dynamics 967
Castillo-Chavez C, Feng Z: To treat or not to treat: the case of tuberculosis 629
Castillo-Chavez C, Huang W, Li J: The effects of females' susceptibility on the coexistence of multiple pathogen strains of sexually transmitted diseases 503
Charter K, Rogers T: Homoclinic chaos in a model of natural selection 294
Cooke KL, van den Driessche P: Analysis of an SEIRS epidemic model with two delays 240
Crawford JW → Davidson FA

Dal Bo S → Rinaldi S
Davidson FA, Sleeman BD, Rayner ADM, Crawford JW, Ritz K: Travelling waves and pattern formation in a model for fungal development 589
De Nittis E → Rinaldi S
de Roos AM → van den Bosch F
Dodd RK: Periodic orbits arising from Hopf bifurcations in a Volterra prey-predator model 432
Drigo Filho E → Teso A

Farrow DA → Skalak R
Feng W: Competitive exclusion and persistence in models of resource and sexual competition 683
Feng Z → Castillo-Chavez C
Feng Z, Velasco-Hernández JX: Competitive exclusion in a vector-host model for the dengue fever 523
Fitzpatrick BG → Ackleh AS

Gardner RH → Hart DR
Gilmour RF Jr → Watanabe M
Gimelfarb A: Some additional results about polymorphisms in models of an additive quantitative trait under stabilizing selection 88
Glendinning P, Perry LP: Melnikov analysis of chaos in a simple epidemiological model 359
Gourley SA, Bartuccelli MV: Parameter domains for instability of uniform states in systems with many delays 843

Hart DR, Gardner RH: A spatial model for the spread of invading organisms subject to competition 935
Heiden an der U → Nauroschat J
Herrero MA, Velázquez JJL: Chemotactic collapse for the Keller-Segel model 177
Hillen T: A Turing model with correlated random walk 49
Hoger A → Skalak R
Högnäs G → Vellekoop MH
Hoppensteadt FC, Mittelmann HD: Wave propagation in mathematical models of striated cortex 988
Huang W → Castillo-Chavez C
Huyer W: On periodic cohort solutions of a size-structured population model 908

Jackson T → Tang B

Kirschner D, Lenhart S, Serbin S: Optimal control of the chemotherapy of HIV 775
Kirzhner V, Lyubich Y: Multilocus dynamics under haploid selection 391
Kopell N → Soto-Treviño C

Lemire M, Lessard S: On the non-existence of an optimal migration rate 657
Lenhart S → Kirschner D
Lessard S → Lemire M
Levin SA → Andreasen V
Lewis MA, White KAJ, Murray JD: Analysis of a model for wolf territories 749
Li J → Castillo-Chavez C
Lin J → Andreasen V
Lizana M, Rivero J: Multiparametric bifurcations for a model in epidemiology 21
Lyubich Y → Kirzhner V

Maini PK → Sánchez-Garduño F
Mittelmann HD → Hoppensteadt FC
Mjølhus E → Wikan A
Müllers K → Bonneuil N
Murray JD → Lewis MA

Nagylaki T: The diffusion model for migration and selection in a plant population 409
Nauroschat J, Heiden an der U: A theoretical approach to *G*-protein modulation of cellular responsiveness 609

Perry LP → Glendinning P
Powell JA: Conditional stability of front solutions 729

Rayner ADM → Davidson FA
Rinaldi S, Dal Bo S, De Nittis E: On the role of body size in a tri-trophic metapopulation model 158
Ritz K → Davidson FA
Rivero J → Lizana M
Rogers T → Charter K

Saldaña J → Calsina À
Sánchez-Garduño F, Maini PK: Travelling wave phenomena in non-linear diffusion degenerate Nagumo equations 713
Satulovsky JE, Tomé T: Spatial instabilities and local oscillations in a lattice gas Lotka–Volterra model 344
Schreiber SJ: Global stability in consumer-resource cascades 37
Schwarz RI: Modeling tendon morphogenesis in vivo based on cell density signaling in cell culture 97
Serbin S → Kirschner D
Sitomer A → Tang B
Skalak R, Farrow DA, Hoger A: Kinematics of surface growth 869
Sleeman BD → Davidson FA
Smith HL: The periodically forced Droop model for phytoplankton growth in a chemostat 545
Solimano F → Beretta E
Soto-Treviño C, Kopell N, Watson D: Parabolic bursting revisited 114

Takeuchi Y → Beretta E
Tang B, Sitomer A, Jackson T: Population dynamics and competition in chemostat models with adaptive nutrient uptake 453
Teso A, Drigo Filho E, Agostinho Neto A: Solution of the Poisson–Boltzmann equation for a system with four ionic species 814
Tomé T → Satulovsky JE

van den Bosch F, de Roos AM: The dynamics of infectious diseases in orchards with roguing and replanting as control strategy 129
van den Driessche P → Cooke KL
van Herwaarden OA: Stochastic epidemics: the probability of extinction of an infectious disease at the end of a major outbreak 793
Velasco-Hernández JX → Feng Z
Velázquez JJL → Herrero MA
Vellekoop MH, Högnäs G: A unifying framework for chaos and stochastic stability in discrete population models 557

Watanabe M, Gilmour RF Jr: Strategy for control of complex low-dimensional dynamics in cardiac tissue 73
Watson D → Soto-Treviño C
White KAJ → Lewis MA
Wiehe T → Baake E
Wikan A, Mjølhus E: Overcompensatory recruitment and generation delay in discrete age-structured population models 195
Witelski TP: Segregation and mixing in degenerate diffusion in population dynamics 695

Xie H → Allegretto W

Yang S → Allegretto W
